

EXPANDER DESK II RUGGED RACK MOUNTABLE DESK

For the progressive user, the Expander II desk is a practical and elegant solution for a solid traveling desk and storage system. In field-deployed, industrial or lab environments, the rugged Expander II will give you the ultimate fold-out desk and storage system.

Add flexibility in space-constrained mobile situations, and provide a safe and secure place to keep any size keyboard and accessories. The Expander II stores firmly in a traveling position inside a 2U rack slot. Dual quick-release locks allow you to slide it out and flip open the side wings to

performance position. When done, close the wings and with one touch it locks into a fully transportable mode.

When space, weight and performance is still what it's all about, the Expander II is the progressive and trusted office desk away from your office.
